

CSC1112: Domain Applications 3

Module Co-ordinator: Sahraoui Dhelim

Lean Canvas Assignment

Note: This assignment is worth 15% of your overall grade for the module.

Submission

1. Lean Canvas + mini report

Mode: Individual assignment**Deadline**

26th April 2026 @ 23:59

Phase 1: Ideation and Market Validation

Before filling out your canvas, you must validate that your business idea solves a real-world problem.

- **The Idea:** Identify a specific industry or problem area (e.g., healthcare, fintech, sustainable energy) where data science and AI can provide a unique solution.
- **Market Study:** Conduct a brief exploration of your target market. This may include primary or secondary research:
 - **User Interviews:** Speak with at least 2 to 3 potential users or domain experts.
 - **Needs Analysis:** Identify the specific "pain points" your target audience faces and how they currently solve them.

Phase 2: The Lean Business Model Canvas

Using the insights from your market study, you will complete a Lean Canvas.

Deliverable:

- A single-page visual diagram of your business model.
- Market Validation Summary (Max. 500 words): A brief report on your market study, including who you spoke to (anonymized) and the key insights gained.
